

New Beauty Enhancements – Semi Permanent Makeup!

February 1, 2020

Body Mind Spirit is now offering Semi-Permanent Makeup which includes Microbladed Brows, Powder Brow, a hybrid of Microbladed/ Powder Brow, or Lipstick and Eyeliner Enhancements. The difference between Microblading and Powder Brow is based on the application technique. Microblading uses a hand tool to apply the pigment in small slash-like motions that mimic brow hair. To get a Powder Brow result, a machine with a needle is used to give a soft pixelated look. All treatments are semi-permanent unlike traditional tattoos because the needle only affects the top layer of the skin. The longevity of cosmetic tattoos varies by person. (People who tend to have drier skin have longer lasting results as compared to a person who has an oilier skin type).

Meghan Cotton, our licensed Artist and Esthetician will draw, measure and map out your brows so you can feel confident with the shape before the pigment is applied. A topical anesthetic cream is used for your comfort. There is minimal downtime, but this procedure does require aftercare for 7-10 days. A take home kit that is all-natural and cruelty-free is provided to ensure you will have the appropriate products during your healing process. The pigments used are all vegan and cruelty free.

So why might you consider Semi-Permanent Makeup? If you have thin, light, “barely there” brows or just want to reshape the brows you have, these services are the solution. These offerings

are not only Beauty Enhancements but will also give you the confidence you deserve. No more wearing makeup to the gym or to the beach! No more stressing out that your makeup will be smudged or sweat off! You can wake up feeling beautiful and confident! Consider these services if you want to save time on daily makeup applications. Meghan will be happy to answer any questions and/or concerns you may have! Give us a call today at 978-449-0200 or book with Meghan at spagroton.com.
